

To the FCC,  
I pay for the XM Satelitte Radio and consider it far superior to the radio stations I can receive for free. I especially like the weather and travel conditions that pertain to my area. When I listen to free radio I may have to wait 20 or 30 minutes before I can hear the information that I need to travel safely. With XM Radio I can hear with in minutes if there is a travel problem that would cause me to revise my plans and therefore travel more safely. Please reject the NAB's petition 04-160 as I feel they are attempting to limit the free speech of XM Radio and severely limit my ability as a paid subscriber to XM Radio to travel safely.

Respectfully,  
Cherri Escobar
